

HUMAN LGALS3BP PROTEIN, FLAG TAG

货号: 11847

产品全名: 人 LGALS3BP 蛋白

规格: 10/50/100 µg

基因符号 90K;BTBD17B;CyCAP;gp90;M2BP;MAC-2-BP;TANGO10B

目标蛋白: LGALS3BP

UNIPROT ID: Q08380

描述: Recombinant Human LGALS3BP Protein with C-terminal 3xFlag tag

背景: The galectins are a family of beta-galactoside-binding proteins implicated in modulating cell-cell and cell-matrix interactions. LGALS3BP has been found elevated in the serum of patients with cancer and in those infected by the human immunodeficiency virus (HIV). It appears to be implicated in immune response associated with natural killer (NK) and lymphokine-activated killer (LAK) cell cytotoxicity. Using fluorescence in situ hybridization the full length 90K cDNA has been localized to chromosome 17q25. The native protein binds specifically to a human macrophage-associated lectin known as Mac-2 and also binds galectin 1. [provided by RefSeq, Jul 2008]

物种/宿主: HEK293

分子量: The protein has a predicted molecular mass of 68.3 kDa after removal of the signal peptide.

分子特征: LGALS3BP(Met1-Asp585) 3×Flag tag

纯化: The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
